Jupiter Plus AS is an official dealer of AdBlue®. AdBlue® can be used with Euro 4 and Euro 5 type of diesel engine vehicles which have a selective catalytic reduction system (SCR).

We offer the AdBlue quality reagent from the leading European manufacturers to our Estonian customers.

In our work we are guided by the norms and requirements accepted to regulate the handling of AdBlue. We are the only importer of AdBlue into Estonia and the reagent corresponds to European standards DIN 70070 and ISO 22241-1. Our company also has the official licence for the AdBlue solution. We offer our clients several possibilities to supply them with AdBlue. We also have means to store it and divide it into suitable quantities for both small companies and large transport companies.

Besides AdBlue and in order to fully satisfy your needs, we also offer lubricants and other preparations for cars from the leading manufacturers.
